

TR1000

Brake disc and drum lathe

The TR 1000 machine is a lathe for cars' and trucks' brake drums that can be a great solution for mechanics who are seeking a reliable and easy-to-use product at a reasonable price. It has been designed on the basis of the TR 1500 model, but without all accessories some users do not need. These devices are available as optional equipment, like the shaft support arm for twin wheels (CPS150) or the powered cross slide feed for disc turning (TR1996).

The main features of the TR 1000 are the structural solidity, granted by the wide use of cast iron for all components (base, tables and lathe unit box), and by its simple use. Some intuitive controls are conveniently located on the machine to allow all adjustments, so as to always obtain the best results in accuracy and finishing.

Images may show the product equipped with optional accessories

Standard equipment

Borgin bar support
Borgin bar for large drums
Large drum turning tool
Safety guard
Truck drum silencer band
Ø 50 mm shaft with nut and spanner
Spacers
Centering cones
Wrench set
Instruction manual

Specifications

Min-Max drum turning diameter: 150~1170 mm
Max disc turning diameter: 865 mm
Longitudinal table travel: 410 mm
Cross slide travel: 145 mm
Spindle rotation speed: 30~120 rpm
Longitudinal table feed: 0~30 mm/min
Cross slide feed (option): 0~30 mm/min
Spindle motor power: 1.5 kW
Table motor power: 0.07 kW
Dimensions (LxWxH): 1970x1400x1470 mm
Weight: 655 kg

Accessories

UT0012

Replacement insert for UT0011, UT5008 and UT5009 (10 pcs.)

UT5008 / UT5009

Right (UT5008) and left (UT5009) hand L shaped insert tool holder

AC0180/3

Adapter plates for hubless brake drums

AC1188

Universal adapter plate for hubless brake drum

TDL30

Light disc and drum centering adapter set

VPD18

small disc & drum adapter set arbor - Ø 18 mm

TR0996

Double adjustable tool holder

UT0015

Truck drum insert tool

PV0060

Grinding drums

PV1250

Arm crane for drum lifting

CPS150

Large twin wheel turning kit with large safety guard
